What's Happening in the World of NAEP for Private Schools?

Thank You to NAEP 2022 Participating Private Schools!

The NAEP Long-Term Trend Age 13 Assessments Are Coming Soon!

Test Yourself With Real NAEP Long-Term Trend Questions

Summer/Fall 2022

### Thank You to NAEP 2022 Participating Private Schools!

Thank you to all of the private schools that participated in the NAEP 2022 assessments. Private schools account for about 24 percent of all schools in the nation and educate about 9 percent of the nation's students. With the participation of private schools, NAEP can provide a more representative report on how the nation's students are performing in important subjects.

NAEP 2022 included the long-term trend age 9 assessments in mathematics and reading, mathematics and reading assessments at grades 4 and 8, and an assessment of civics and U.S. history at grade 8. Results from the long-term trend age 9 assessments and the mathematics and reading assessments at grades 4 and 8 are expected to be released in fall 2022. Results from civics and U.S. history are expected to be released in 2023. For more information about assessment plans and upcoming releases, visit <http://nces.ed.gov/nationsreportcard>.

### What's Happening in the World of NAEP for Private Schools?

#### Spring Through Summer 2022

- Private schools selected for the NAEP long-term trend age 13 assessments in mathematics and reading will be notified.
- The NAEP 2022 assessments, conducted from January through March 2022, are being scored and the results are being analyzed in preparation for the release of results.

#### Fall 2022

- Private schools selected for the NAEP long-term trend age 13 assessments in mathematics and reading will prepare for the assessments with the help of NAEP representatives.
- Private school students selected for NAEP long-term trend age 13 will take assessments from October 10 through December 16, 2022.
- Results from the NAEP 2022 long-term trend age 9 assessments will be released.
- Results from the NAEP 2022 mathematics and reading assessments at grades 4 and 8 will be released.

## The NAEP Long-Term Trend Age 13 Assessments Are Coming Soon!

Since the 1970s, NAEP has monitored student performance in mathematics and reading through long-term trend assessments. These assessments measure students' educational progress over long time periods to look for and monitor trends in performance. Results from the long-term trend assessments are based on nationally representative samples of 9-, 13-, and 17-year-olds in public and private schools. Main NAEP assessments change about every decade to reflect changes in curriculum in the nation's schools, whereas the long-term trend NAEP assessments have remained relatively unchanged since 1990. This fall, the long-term trend assessments will be administered between October 10 and December 16 to 13-year-old students in public and private schools across the country. Learn more about the upcoming long-term trend assessments in private schools at [https://nces.ed.gov/nationsreportcard/participating/private\\_nonpublic.aspx](https://nces.ed.gov/nationsreportcard/participating/private_nonpublic.aspx).

## Test Yourself With Real NAEP Long-Term Trend Questions

Did you know that sample mathematics and reading questions from the long-term trend age 13 assessments are available online in an interactive "test yourself" format? Visit <https://nces.ed.gov/nationsreportcard/nqt> to try answering some of the same questions students have responded to on actual NAEP assessments and see how your scores compare to those of students across the nation.

To get started, select "Test Yourself," and then select the subject and age you wish to explore. You can choose between 1 and 30 questions and select easy, medium, and/or hard questions to try. Once you have made your selections, select "Start Test" to begin.

### NEW NAEP VIDEO – THE IMPORTANCE OF PRIVATE SCHOOL PARTICIPATION IN NAEP

Private schools' participation in NAEP is critically important. Learn how it helps NAEP provide accurate results about private schools' performance compared to public schools, and how NAEP gives private schools a voice in the national education conversation.
